

# Little Bob Minor

St. Chad's Pattingham Bellringers

plain lead

bob

single

The treble plain hunts only as far as 4ths place. At the treble lead one bell makes seconds and the others dodge. When the treble makes 4ths the bells in 5-6 dodge. The effect of this is that the working bells always dodge in 5-6 both up and down and they dodge in 3-4 unless they meet the treble. If a bell dodges in 3-4 down it will lead and then dodge in 3-4 up. A bell which does not dodge in 3-4 down will lead and then make seconds over the treble and lead again and then not dodge in 3-4 up.

At a bob:

- the bell which would make 2nds runs out - then dodges 5-6 up and down and does not dodge 3-4 on the way down
- the bell which would dodge 3-4 down runs in to lead - does not dodge in 3-4 on the way up
- the bell which would dodge 3-4 up makes 4ths and goes in - it dodges in 3-4 on the way up

At a single:

- the bell which would make 2nds is unaffected
- the bell which would dodge 3-4 down makes 3rds and goes back up to dodge 5-6 up and down and does not dodge 3-4 on the way down
- the bell which would dodge 3-4 up makes 4ths and goes in (as at a bob) - it dodges in 3-4 on the way up

A tip to know whether to dodge in 3-4 on the way down - when you are dodging in 5-6 down is your first blow in 5ths over the treble? - if so the treble is making 4ths and it will be leading when you get to 3-4 so you will dodge in 3-4 down.
