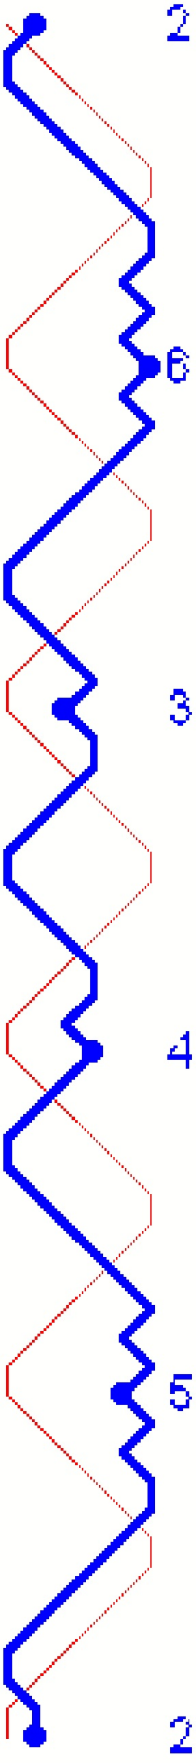
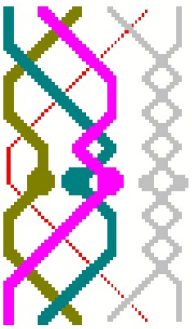
Single Oxford Bob Minor

St. Chad's Pattingham Bellringers

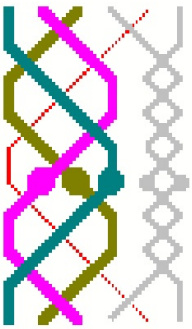
blue line



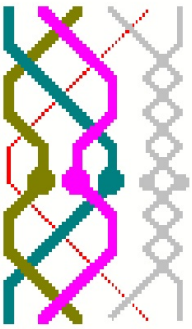
plain lead



bob



single



The treble plain hunts. When the treble leads a bell makes seconds and the bells in 3-4 and 5-6 dodge. The bell which dodges 3-4 up at the treble leads then makes 4ths and goes back to the front and then out to 4ths again and then dodges 3-4 down. While 4ths place is being made the bells in 5-6 dodge. Otherwise the working bells plain hunt.

In practice this means that the bells on the back are triple dodging and the bells on the front seem to ring bob minimus.

This method is Double Oxford Bob above the treble and Plain Hunt below the treble.

At a bob:

- the bell which makes 4ths and dodges 3-4 down runs in
- the bell which dodges 3-4 up makes 4ths and goes down
- the bell which makes 2nds runs out as far as 4ths and then goes back down

At a single:

- the bell which makes 4ths then 3rds then 4ths and down
- the bell which dodges 3-4 up makes 4ths and goes down
- the bell which makes 2nds is unaffected

By place passing treble going up				
pass treble		at plain lead	at bob	at single
●	1-2	make seconds	run out to 4ths and in	unaffected (make seconds)
●	2-3	dodge 3-4 up then 4ths and down	make 4ths and down	make 4ths and down
●	3-4	make 4ths then dodge 3-4 down	make 4ths and run in	make 4ths then 3rds then 4ths then down
●	4-5	triple dodge 5-6 up	unaffected	unaffected
●	5-6	triple dodge 5-6 down	unaffected	unaffected
